

```
mod_stats::variance  
::variance_value_of  
_vector_real32
```

A diagram illustrating a pointer relationship between two variable declarations. On the left, a gray rectangular box contains the text 'mod\_stats::variance ::variance\_value\_of \_vector\_real32'. A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'mod\_stats::variance \_value\_of\_vector\_real32'.

```
mod_stats::variance  
_value_of_vector_real32
```
