

```
mod_linear_regression  
::lasso_regression::fit
```

```
graph LR; A["mod_linear_regression::lasso_regression::fit"] --> B["mod_linear_regression::fit_simple_lasso_regression"]
```

A diagram showing a transformation from a standard lasso regression fit to a simplified version. It consists of two rectangular boxes connected by a dark blue arrow pointing from left to right. The left box is white with a black border and contains the text 'mod\_linear\_regression' followed by '::lasso\_regression::fit' on the next line. The right box is light gray with a black border and contains the text 'mod\_linear\_regression' followed by '::fit\_simple\_lasso\_regression' on the next line.

```
mod_linear_regression  
::fit_simple_lasso_regression
```
